SUMMARY

Aspiring Full Stack Developer passionate about building real-time, interactive web applications. Experienced in developing dynamic, user-centric solutions with Next.js, Express.js, and Socket.IO. Committed to delivering responsive, secure, and high-quality web experiences.

SKILLS

Programming Languages: JavaScript, TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Node.js, Express.js, Socket.IO, Zustand, React Query, Zod, ShadCN, JSON Web Token (JWT)
Databases / ORM: MongoDB (Mongoose), PostgreSQL (Prisma)
Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Cloudinary
AI Tools: ChatGPT, Claude, Copilot

PROJECTS

CommuHelp: An Online Counseling and Support System for FCU High School Students April 2025 - Present

Capstone full-stack web application providing safe and anonymous mental health support for students, enabling real-time communication, community spaces, mood tracking, counseling appointments, and AI-assisted guidance.

Technologies: Next.js, Typescript, React Query, Tailwind CSS, Socket.IO, Twilio, Cloudinary, Grok (LLM-Versatile), Express.js, Prisma (PostgreSQL), Redis, JWT, Node.js

- Built an authenticated counseling platform with anonymous community spaces and forum-based discussions
- Implemented secure authentication with role-based access for students, teachers, staff, and counselors
- Developed core counseling features including appointment scheduling, session records, and mood tracking
- Integrated real-time communication features such as announcements, direct messaging, and video counseling sessions
- Integrated an AI-powered assistant to provide guided support and basic user assistance within the platform
- Built mood tracking functionality to help users monitor and reflect on their emotional well-being over time

PROJECTS

ChitChat – Real-Time Messaging App

August 2024 - January 2025

Developed a full-stack real-time messaging app supporting public chat, direct messages, and group chats

Technologies: Next.js, Express.js, Typescript, MongoDB (Mongoose), NextAuth, Socket.IO

- Implemented public, direct, and group chat functionalities with real-time updates
- Integrated user authentication and session management using NextAuth
- Stored and retrieved chat data in MongoDB using Mongoose
- Built the user interface using Tailwind CSS

Memory Game – Web-Based Puzzle Game

April 2024 - August 2024

A responsive web application that challenges users’ memory with multiple difficulty levels and game modes.

Technologies: Next.js, TypeScript, Express.js, Mongoose (MongoDB), Tailwind CSS, JWT

- Developed a web-based memory game with multiple game modes and difficulty levels
- Implemented fair card shuffling logic to ensure randomized gameplay
- Added a leaderboard system to track high scores and encourage competition
- Designed a responsive and interactive UI with sound effects for an engaging user experience
- Implemented basic user authentication to manage player sessions

EDUCATION

Filamer Christian University

September 2022 - Present

Bachelor of Science and Information Technology
